ACE MEASURING ARM RANGE

PRECISELY FOR YOU

Thanks to innovative technology and state-of-the-art manufacturing, Kreon® measuring arms from the ACE range offer advanced 3D measuring solutions for both scanning and probing.

Compliant with the latest ISO standards and compatible with leading software available on the market, they meet increasingly stringent demands in terms of precision and productivity.

The ACE range comprises two models: the ACE and the ACE+ measuring arm. Working with the latest encoder technology, the ACE+ arm also boasts an advanced calibration method, ensuring exceptional levels of performance.

Portable and exceptionally easy to use, measuring arms from the ACE range have their place in any working environment – workshops, measuring labs, outdoor sites – and in a wide range of high-tech industries, such as automotive and aeronautics.

ACE arm   ACE+ arm

7 AXES AND 6 AXES

Kreon ACE measuring arms are available in 6-axis and 7-axis versions. Each offers benefits for specific applications.

6-AXIS VERSION FOR PROBING

▸ Perfect for applications requiring highly accurate probing
▸ At identical sizes, greater accuracy with 6 axes as compared to 7
▸ The very fine tip of the arm ensures easy probing of cavities
▸ Compatible with Kreon 3D scanners (Zephyr and Solano ranges)

7-AXIS VERSION FOR SCANNING

▸ An additional axis and a joint enhance ergonomics when scanning
▸ Integration of the Skyline 3D scanners range
▸ Easy switchover from scanning to probing
▸ Both scanning and probing within the same measuring range
▸ Scanning precision up to 45 µm

7-AXIS VERSION WITH SKYLINE SCANNER = ACE SKYLINE

EXCELLENCE IN EVERY DETAIL

Efficient, lightweight and accurate, KREON ACE arms are the ultimate solution for ensuring flawless production quality, whatever your application and the size of your company.

ACE arms fitted with the Skyline 3D scanners can digitise any part in the twinkling of an eye. **Accurate and at high resolution, they capture the smallest details in the most complex parts**. A Skyline scanner combined with an ACE arm offers an ergonomic system for effortless scanning.

"All you need ...

Safe
Axes' limits autodetection
Stable magnetic rest position
Parking position amortizer
Laser class 2M (no protection needed)

Portable
Integrated battery
Wi-Fi connexion for probing
Temperature compensation
Universal Brunson attachment

Easy to use
Quick set up
Freedom of movement
Short learning curve
No warm-up time
Compatible with leading metrology software

Effortless
Lightweight mobile parts
Counterbalance
Infinite joint rotation

SAVE MORE TIME
with a reliable, performant and easy to use system,
at an incredible acquisition speed.

SCAN ANY PART
dark or clear, dull or shiny, big or small or all at once.
Its freedom of movement enables an access to internal or back side of difficult or
closed volumes.

SCAN ANYWHERE
in a metrology room, a workshop, on a machine tool or even outside,
due to temperature compensation

CONTROL WITH CONFIDENCE
the freeform parts with the extreme accuracy of Skyline scanner
and the geometrical elements with the probe integrated under the scanner.

Flexible
Removable scanner
Probe diameter autodetection
Ergonomic handle
«Push and Pull» trigger

Performant
High accuracy
High resolution
High speed
Compact and lightweight scanner
Probing and scanning in the
same measuring range

... and more"

SKYLINE SCANNERS: SPEED AND ACCURACY

Skyline scanners use state-of-the-art technologies developed by KREON for nearly 30 years. Apart from leading technical capabilities, they are highly reliable, compact and adapt to almost any working environment.

Based on a single technology platform, Skyline 3D scanners are available in three models: Skyline **Eyes**, **Wide** and **Open**.

ADVANCED SCANNING SPEED **200mm**[*] **laser line**

▸ Decreased number of scan passes on the part given to max 200 mm laser line*
▸ Faster movement of the 3D scanner assured by the increased frequency
▸ Acquisition speed of 600,000 points/sec, allowing to quickly get the dense point cloud*
▸ Ergonomic "push and pull" handle, providing a fabulous scanning efficiency

HIGH RESOLUTION **25μm**[*] AND HIGH ACCURACY **9μm**[*]

▸ 2,000 points per laser line for a high resolution level*
▸ Optimal accuracy, even on shiny reflective surfaces, due to blue laser fineness
▸ Temperature compensation of the 3D scanner to avoid pre-heating and to maintain a constant accuracy

EASE OF USE

▸ Scan longer owing to the 3D scanner lightness (weight less than 400 g)
▸ Reach and scan the hard-to-access zones of each part, thanks to compactness
▸ Visualize precisely the ideal scanning distance with the LED indicator
▸ Remove the scanner rapidly and without any tool to accelerate the probe mounting

Software used for probing and scanning:
Polyworks, Metrolog, Geomagic, PowerInspect, Capps, etc

*maximum values depending on the Skyline scanner model

	Accuracy	Scan rate	Speed	Resolution
Eyes	██████	██████	█████░	██████
SKYLINE **Wide**	█████░	██████	██████	████░░

TESTIMONIALS

Our customers choose ACE arms because…

MANN+HUMMEL

Ryan Chapman, Head Metrologist at Mann Hummel:
"We never imagined that the ACE arm with its scanner would increase our productivity, inspection quality and profitability so significantly."

IMARC OFFICE CHAIR COMPONENTS

Michele Rausse, Head of Technical Department at IMarc:
"The ACE arm is a high-performance, versatile piece of equipment that meets all our measurement needs. Hard to see how we ever got by without it!"

HermanMiller

Levi Meyer, Head Metrologist Herman Miller:
"The ACE Skyline arm, initially acquired for inspecting tubes, has come into its own in other applications too."

EUROTECH ENGINEERING AND MANUFACTURING FOR RESEARCH

Marco Magnifico, Aerospace Engineer at Eurotech:
"Sometimes we use the Kreon measuring arm non-stop for a whole week. During these peak periods, we know we can count on its reliability."

COMPOSITECH CARBON FIBER TECHNOLOGY

Fabio Panarelli, Quality Inspector at Compositech:
"The speed and ease of use of the ACE Skyline arm have allowed us to significantly increase our productivity across the inspection phases."

ACE+ versions with a 2m working volume and with 6 axes are coming soon.

All specifications are subject to change without notification

According to ISO 10360-12 , 2016 :
E_{UNI} *(EUni:0:Tact.AArm) : Unidirectional distance error between two probed points in the arm volume*
P_{SIZE} *(PSize.Sph.1x25:Tact.AArm) : Error on the measurement of a sphere diameter by probing*
P_{FORM} *(PForm.Sph.1x25::Tact.AArm) : Dispersion value in measurement of a sphere radius by probing*
L_{DIA} *(LDia.5x5:Art:Tact.AArm) : Errors due to arm articulations, mainly axes 5, 6 and 7 of the wrist, measured with probe*
SPAT *: Measurement error when the probe is stationary and the arm elbow moves from left to right*

According to ISO 10360-8:2013:
L_{DIA} *scanning (LDia:j:ODS) : Errors due to arm articulations, mainly axes 5, 6 and 7 of the wrist, measured with scanner*
[1] MPE (P[Size.Sph.All:Tr:ODS]): Error on the measurement of a sphere diameter by Scanning
[2] MPL (P[Form.Sph.D95%:Tr:ODS]): dispersion value on 95% of the measured points on a sphere
[3] MPL (P[Form.Pla.D95%:Tr:ODS]): dispersion value on 95% of the measured points on a plane

SKYLINE SCANNERS RANGE

	EYES	WIDE	OPEN
Max scanning speed	600.000 pts/sec	600.000 pts/sec	200.000 pts/sec
